## WAGE RATES AND EARNINGS : FEBRUARY 1975

### CONTENTS

Table	Page
<b>I. Wage Rates Indexes</b>	
.. Explanatory notes	2
Adult male wage rates	
Weekly rates :	
1. Industry groups, States, 28 February 1975	4
2. All groups, States, February 1973 to February 1975	5
3. Industry groups, Australia, February 1973 to February 1975	6
4. Industry groups, States, October 1974 to February 1975	8
5. Federal and State awards, etc., States, February 1973 to February 1975	10
6. Federal and State awards, etc., Australia, June 1939 to February 1975	11
Hourly rates :	
7. Industry groups, States, 28 February 1975	12
8. All groups, States, February 1973 to February 1975	13
Adult female wage rates	
9. Weekly rates, industry groups, States, 28 February 1975	14
10. Hourly rates, industry groups, States, 28 February 1975	14
11. Weekly rates, all groups, States, February 1973 to February 1975	15
12. Hourly rates, all groups, States, February 1973 to February 1975	16
13. Weekly rates, Federal and State awards, etc., States, February 1973 to February 1975	17
<b>II. Basic Wages, Minimum Wages, and Increases in "Total Wages"</b>	
.. Federal basic wage rates	18
14. State basic wage rates	18
15. Minimum wage, adult males and adult females - Federal awards	18
16. Minimum wage, adult males and adult females - State awards	19
17. General increases in award "total wages"	19
<b>III. Average Weekly Earnings Per Employed Male Unit</b>	
.. Explanatory notes	20
18. Average weekly earnings per employed male unit, Australia, 1966 to 1974	21
19. Average weekly earnings per employed male unit, States and Territories, 1966 to 1974	21
<b>IV. Surveys of Weekly Earnings and Hours</b>	
.. Explanatory Notes	22
Total (Private and Government) Employees -	
All employees -	
20. Average weekly earnings, States and Territories, October 1972 and 1973	23
Full-time employees other than managerial, etc. staff -	
21. Average weekly earnings and hours, States and Territories, October 1972 and 1973	24
22. Average weekly overtime and ordinary time earnings and hours, Australia, October 1972 and 1973	24
23. Average earnings and hours, industry groups, Australia, October 1973	25
Part-time employees -	
24. Average weekly earnings and hours, Australia, October 1972 and 1973	26
Private Employees -	
Full-time managerial, executive, etc. staff -	
25. Average weekly earnings, industry groups, States and Australia, October 1972 and 1973	26

## I. WAGE RATES INDEXES

1. This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100. Less detailed statistics are first published in the monthly statement, *Wage Rates Indexes (Preliminary Statement)* (Reference No. 6.37).
2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations. In the majority of cases the rates are prescribed in awards or determinations of Federal or State industrial authorities or in collective agreements registered with them. Rates prescribed in unregistered collective agreements are used where these are dominant in the particular industries to which they refer.
3. The Wage Rates Indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and collective agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. in the various industries, thereby providing occupation weights.
4. The minimum wage rates used in the indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each period commencing with March 1939 for adult males and March 1951 for adult females. The current index for adult males includes rates for 3,415 award designations prescribed in 501 awards, determinations and collective agreements. As some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 award designations, 187 awards, etc. and 515 individual award occupations. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the indexes. A list of the major awards used in the compilation of the wage rates index for adult males, together with explanatory notes, was shown in the July 1974 and August 1974 issue of this publication. The industry weighting pattern of the indexes is shown on page 79 of *Labour Report* No. 57, 1972.
5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary earners are excluded. Thus awards relating to employees in the Finance and Property industry group (banking, insurance, etc.) are excluded as are awards relating to occupations such as engineers, scientists, architects, teachers, nurses, etc. and to administrative employees in government services. Some awards that specify annual rates of pay for certain occupations mainly in government employment (for example, mail officers, postal officers, drivers, linemen, telecommunications technicians, clerks and clerical assistants, office machine operators, typists, telephonists, etc.) are included.
6. The rates for particular occupations used in the indexes are prescribed in awards, determinations and collective agreements as set out in paragraph 2 above. Relevant rates of prescribed minimum wages for adult males and adult females (see pages 18 and 19) are used when applicable. For some occupations general loadings of various kinds are included. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the wage rates indexes. Annual leave loadings, prescribed in many awards, etc., are not included in the wage rates indexes. The ten per cent additions to minimum wage rates for adult males first prescribed in some Western Australian State awards in October 1970 are included in the wage rates (see page 18).
7. In recent years the award rates of pay for some government employees have been based on actual rates of pay for employees in the private sector, which include over-award payments, loadings, etc. Thus award rates of pay for government employees in certain occupations will be higher than those for private employees in comparable occupations. This may affect the relative levels of the weighted average minimum wage rates in industry groups which have a large component of government employees (for example, the Communication group).
8. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in the tables in this section are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

9. Since 1954 the industrial structure in Australia has undergone changes which are likely to have had some effects on the representativeness of the regimen of the indexes. These effects are mitigated because occupations in new or expanding industries are often covered by existing awards and the wage rates for new occupations usually conform very closely to those for existing occupations. Also, where an entirely new award has been made and the number of employees affected has warranted such action, occupations from the new award have been introduced into the indexes. These latter cases have not been of great significance.

10. Weighted average minimum weekly wage rates for adult males and adult females covered by "Federal awards, etc." and for those covered by "State awards, etc." (as defined below) are shown separately in Tables 5, 6 and 13. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

Relevant definitions are as follows :

"Federal awards, etc." include awards of, or collective agreements registered with, the Australian Conciliation and Arbitration Commission and the Coal Industry Tribunal, and determinations of the Australian Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are dominant in the particular industries to which they refer.

11. The proportion of employees covered by Federal and State awards, etc. varies considerably between States. In addition, the proportions of employees engaged in the respective industries and occupations differ from State to State. As a result there may be relatively wide differences between the weighted average wage rates in the several States.

12. Weekly wage rates for adult males cannot be compared directly with average weekly earnings per employed male unit shown in Section III, because the latter include the actual earnings of all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) in all industries. The figures of earnings are quarterly averages and include, in addition to wages and salaries at award, etc. rates, overtime earnings, over-award and bonus payments, and payments made in advance or retrospectively during the periods specified. They also reflect changes in the importance of different industries and occupations. Certain of these differences also apply to the average weekly earnings figures shown in Section IV.

13. Wage rates and index numbers for adult males are available as at the end of each quarter from March 1939 to December 1956 and as at the end of each month from January 1957. Particulars for adult females have been compiled quarterly from March 1951 to June 1967 and monthly from July 1967. For details of wage rates and index numbers from 1939 reference should be made to the following bulletins.

*Minimum Wage Rates, March 1939 to June 1965* (Reference No. 6.17)

*Wage Rates Indexes, June 1965 to June 1968* (Reference No. 6.21)

*Wage Rates Indexes, June 1968 to June 1972* (Reference No. 6.33)

*Wage Rates and Earnings, June 1974* (Reference No. 6.16) for final figures July 1972 to June 1973.

Figures subsequent to June 1973 will be found in the monthly bulletins, *Wage Rates and Earnings*, commencing with the June 1974 issue and in the monthly statements, *Wage Rates Indexes (Preliminary Statement)* (Reference No. 6.37).

14. In some cases, when awards, etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in wage rates in respect of the occupations included in the indexes. Because of these delays, etc., figures for July 1973 and subsequent months are subject to revision. As such revisions are made they are published in the normal monthly tables of this bulletin. Considerations of space preclude the publication herein of revised figures for each industry group in each State but these are available on request. Final figures for months to June 1973 will be found in bulletins listed in paragraph 13 above. Final figures for months to June 1974 will be published in the June 1975 issue of *Wage Rates and Earnings* bulletin.

TABLE 1. — WEEKLY WAGE RATES : ADULT MALES (a)  
INDUSTRY GROUPS, 28 FEBRUARY 1975 (b)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and collective agreements; and index numbers of wage rates.

(a) See paragraph 8, page 2. Excludes rural industry; mining and quarrying; and building and construction. For definitions, see paragraph 10, page 3. Figures for July 1973 and subsequent months are subject to revision — see paragraph 14, page 3. (b) The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

## II. BASIC WAGES, MINIMUM WAGES, AND INCREASES IN "TOTAL WAGES"

Information in this section gives details of basic wage rates (see below), rates of minimum wage for adult males and adult females (see below and page 19), and general increases in award "total wages" (page 19), prescribed in recent years in awards of Federal and State industrial tribunals. For further information on wage determination in Australia see the Official Year Books or the annual Labour Reports. The Appendix to *Labour Report No. 57, 1972* (pages 319-33) contains long-term tables of basic wage rates, tables of minimum wage for adult males, and details of general increases in award "total wages".

**Federal Basic Wages.** In June 1967 the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967 (see page 19).

**State Basic Wages.** Basic wages operate in all States except Victoria where basic wages and margins were deleted from Wages Board determinations and wage rates expressed as total wages from July 1967 (see page 19).

			17 September	44.00	39.00
			1974 31 May	48.50	43.50

(a) Rates shown are operative in the Southern Division - Eastern District (including Brisbane). District allowances are added for other areas - see *Labour Report No. 57, 1972* (page 142). (b) In addition to the basic wage increases, margins in awards were increased by 2 per cent in May 1973. (c) Total award wages were increased by 2 per cent plus \$2.50 a week in May 1973 and May 1974 and are inclusive of the basic wage increases. (d) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (e) Some Western Australian State awards include provisions for additions to minimum wage rates for adult males equal to ten per cent of the sum of the basic wage and margins. These provisions were first prescribed in October 1970.

**Federal Minimum Wages.** In its decision in the Basic Wage, Margins and Total Wages Cases of 1966, the Commonwealth Conciliation and Arbitration Commission inserted a provision in awards prescribing a minimum wage for adult males. This stated that no adult male employee shall be paid at less than the prescribed minimum rates as ordinary rates of pay in respect of the ordinary hours of work prescribed by the award. The weekly rates of minimum wage prescribed for adult males were the appropriate basic wages plus \$3.75 a week.

In its decision in the National Wage Case 1974, the Australian Conciliation and Arbitration Commission decided to award the same minimum wage to adult males and adult females. The minimum wage for adult males would be extended to adult females in three steps - 85 per cent of the male minimum wage would be payable to adult females from the beginning of the first pay-period commencing on or after 23 May 1974; 90 per cent from the beginning of the pay-period in which 30 September 1974 occurs; and 100 per cent from the beginning of the pay-period in which 30 June 1975 occurs.

15 May	72.70	72.00	70.50	71.60	72.10	72.60	72.30	74.70

(a) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (b) Rates shown for Darwin are applicable in the Northern Territory north of the 20th parallel of south latitude. Rates for the Northern Territory south of this parallel are \$1.60 a week less for adult males. (c) Rates are operative from the beginning of the pay-period in which 30 September 1974 occurs.

State Minimum Wages. State awards in all States include provisions prescribing rates of minimum wage for adult males and adult females similar in concept to the Federal award provision of minimum wage (see page 18) and these rates are shown in the following table.

(a) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (b) Rates are operative from the beginning of the pay-period in which 30 September 1974 occurs. (c) Date of general ruling by the Industrial Commission. (d) Rates shown are operative in the Southern Division — Eastern District (incl. Brisbane). District allowances are added for other areas — see *Labour Report No. 57, 1972* (page 142) for allowances for adult males. Adult females receiving the minimum wage received 85 per cent of these allowances in May 1974 and 90 per cent in September 1974.

Total Wages. All weekly rates of total wages for adult males and adult females in awards of the Australian Conciliation and Arbitration Commission and Victorian Wages Board determinations have generally been increased as set out below.

(a) Operative from the beginning of the first pay-period commencing on or after the date shown.

### III. AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT

This section presents estimates of average weekly earnings of civilian wage and salary earners for each State and Territory and Australia. These figures are also published in the quarterly statement, *Average Weekly Earnings* (Reference No. 6.18).

#### Definition of earnings

2. The earnings figures used in the calculation of the averages comprise award and over-award wages and salaries, the earnings of employees not covered by awards, overtime earnings, bonuses and allowances, commissions, directors' fees and payments made retrospectively or in advance during the quarter. Earnings of part-time as well as full-time employees, and of juniors as well as adults, are included.

#### Method of estimation

3. For industries other than agriculture and private domestic service, particulars of employment and wages and salaries are derived from payroll tax returns and from direct returns from government and other bodies. These returns account for approximately 90 per cent of wage and salary earners in these industries, as published monthly in the bulletin *Employment and Unemployment* (Reference No. 6.4). Estimates are made for the unrecorded balance in terms of both numbers and earnings. The level of average earnings estimated for the unrecorded sector is approximately 80 per cent of the level shown by the direct returns. For agriculture and private domestic service, employment and earnings are estimated from other sources and are included in the calculations.

4. For employees reported on more than one payroll, all reported wage and salary earnings are included in calculation of the averages.

#### Male units

5. Particulars of wages and salaries paid are not available for males and females separately from the sources used for this series; average weekly earnings have therefore been calculated in terms of *male units*, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings. Different ratios of female to male average earnings are used for individual States, based on information from the annual surveys of weekly earnings and hours, from a sample survey carried out in November 1969 and from other sources. Ratios used for the current quarter are as follows: New South Wales 63 per cent, Victoria 63, Queensland 59, South Australia 58, Western Australia 57, Tasmania 61, the Northern Territory 64, and the Australian Capital Territory 60. As the number of male units used in calculating Australian average weekly earnings is the sum of the estimates for the States and Territories, a separate ratio for Australia is not used, but the weighted average of the State and Territory ratios is approximately 61.5 per cent. Changes in these ratios may be necessary from one quarter to the next to reflect, for example, the extension of equal pay provisions, or appreciable and sustained changes in the levels of male overtime earnings. However, small differences in these ratios have relatively little effect on the earnings figures; if the ratio is understated by one percentage point then average weekly earnings of \$150 would be overstated by about 60 cents.

6. For a number of reasons, average weekly earnings per employed male unit cannot be compared directly with the weekly wage rates shown in Tables 1 to 6. The figures in Tables 1 to 6 are weighted average minimum award, etc. rates payable to adult male wage earners in non-agricultural industry for a full week's work, at the end of each month or year. Those in Tables 18 and 19 represent actual average weekly earnings for all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) and are quarterly or annual averages.

#### Seasonally adjusted estimates

7. Quarterly figures are affected by seasonal influences. For example, special payments, including prepayment for holiday periods, tend to raise the December quarter and to depress the March quarter averages. In addition, figures are affected by the varying number of pay-days in different quarters, (with the exception of Australian Government pay-days in the Northern Territory and the Australian Capital Territory, for which special adjustments have been made in the original series). Allowance for these variations, and for recurring seasonal influences, has been made in calculating the seasonally adjusted estimates for all series shown in Tables 18 and 19. The seasonal adjustment factors were derived from a series from which the influence of major changes in awards and determinations and estimates of the effects of pay-day variations had first been removed. While the seasonally adjusted series retains the effect of the major awards, etc. changes, the pay-day effect is excluded. A detailed description of the methods of seasonal adjustment is given in *Seasonally Adjusted Indicators, 1974* (Reference No. 1.10).

#### IV. SURVEYS OF WEEKLY EARNINGS AND HOURS

**General** — Since 1960 a number of statistical surveys of wages and hours of work in Australia have been conducted. Each of these surveys is listed below and reference made to the publications containing detailed results. As these surveys were based on samples, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published for these surveys including that shown in the following tables has been determined after considering estimated measures of sampling variability. In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's October survey results.

**Survey of Wage Rates and Earnings, September 1960** — For results of this survey of marginal rates of wages and actual weekly earnings of full-time adult male employees see *Labour Report No. 50, 1962 and 1963* (pages 80-83).

**Survey of Weekly Earnings, October 1961** — Results of this survey about the distribution of actual weekly earnings of full-time adult males were published in *Labour Report No. 50, 1962 and 1963* (pages 83-86).

**Survey of Weekly Earnings, October 1965** — This survey obtained average weekly earnings for full-time adult and junior males in private and government employment; and for full-time adult males, the number in various weekly earnings groups, and a dissection of total weekly earnings into overtime earnings, ordinary time earnings at "award, etc. rates", and ordinary time earnings in excess of "award, etc. rates". For detailed results see *Labour Report No. 53, 1967* (pages 80-96).

**Survey of Weekly Earnings (Size Distribution), May 1971** — The object of this survey was to obtain, for private and government employees, estimates of the numbers and proportions of full-time adult male employees (paid for a full week) in various total weekly earnings groups, average weekly total earnings for these employees, and a dissection of average weekly total earnings into average weekly overtime earnings and average weekly ordinary time earnings. Separate details were obtained for (a) male managerial, executive, professional and higher supervisory staff, and (b) other full-time adult male employees. Similar statistics were last obtained from a survey of weekly earnings in October 1965 (see above) but that survey did not have as wide an industry scope as this current survey. For detailed results, etc. of this survey, see *Labour Report No. 56, 1971* (pages 117-170).

#### **Survey of Weekly Earnings and Hours, October 1962 to 1964, 1966 to 1973**

- (i) *Surveys to 1972* (private employees). Sample surveys in respect of most private employers subject to payroll tax have been conducted for the last pay-period in October in recent years. Detailed results, explanatory notes, etc. of these surveys were published in *Labour Report No. 56, 1971* and *Labour Report No. 57, 1972*. The estimates shown in these Labour Reports (and in earlier issues) are not directly comparable with those published in the bulletins (Reference Nos 6.36 and 6.40) — see below.
- (ii) *The 1972 and 1973 surveys* (private and government employees). Commencing with the October 1972 survey coverage was expanded to include, (i) private employees in the Northern Territory and the Australian Capital Territory, (ii) employees in non-government hospitals not subject to payroll tax and (iii) employees of Australian, State and local government authorities. Detailed results of the October 1972 survey, including separate results for employees in the private and government sectors, and for the Territories, were published in the bulletin *Survey of Weekly Earnings and Hours, October 1972 (Private and Government Employees)* (Reference No. 6.40).

A summary of some of the results of the October 1973 survey together with some comparisons of the results of the October 1972 survey are shown in Tables 20 to 25. The figures for October 1973 shown in these tables are preliminary and subject to revision. For more details, explanatory notes, etc. see *Survey of Weekly Earnings and Hours, October 1973 (Preliminary Statement)* (Reference No. 6.36).

**NOTE:** Average weekly earnings figures for males shown in Tables 20 to 25 are not directly comparable with estimates of average weekly earnings per employed male unit shown in Tables 18 and 19, since they relate to only one pay-period in October, not to the average for a quarter, and their coverage is less extensive.
